See you at Forest Park on September 24

Hi:

I find it hard to believe we are approaching our 4th session in our OLLI study group. Ok, I'm a bit sad because time is fleeting so quickly. I'm sending this reminder that we will be meeting at 9:30 a.m. on Thursday, September 24 at **Forest Park Nature Center**. I will be waiting near the pavilion/ shelter adjacent to the A frame building (where we met a couple of weeks ago). Why visit the same area two weeks apart? Because we should see many different species depending on the weather and the fact that we are two weeks later in the season. Yes, insect species and abundance can vary significantly in such a short span of time.

I continue fleshing out a list of the insect species we encounter on our excursions. If possible, please send me the photos you have taken of insects on our field trips so far. I hope to have a reasonable documentation of the species, but I can't do this without your photos. Just send them to me by email as soon as possible. You can find the page at this link - https://centralillinoisinsects.org/2026-olli-study-group/

I have updated our web page - https://insectsmatter.net/olli/olli-26/ with information for our September 24 session. Please examine the updates.

As always, please reach out to me with any questions and comments.

See you at 9:30 on September 24 at Forest Park Nature Center. What will we encounter this time?
